Ecocity Bibliography

Compiled by Carli Lowe, for the Environmental Design Library, University of California, Berkeley

Created in conjunction with the Fall, 2017 exhibit Ecocity Berkeley: 30 Years On that explored the ideas of Richard Register and other ecological thinkers, this bibliography identifies seminal works related to ecocities and ecocity design. The titles below span nearly fifty years of innovative thinking including the principles and practices of sustainable urban development, the policies and procedures required to transform urban design, and the social and philosophical issues that underlie these approaches.
